

# OZINGA®

## LOGISTICS & CONSTRUCTION HAULING MANAGEMENT CAPABILITIES STATEMENT

### OVERVIEW

Our deep understanding of supply chain management, the construction industry, and use of best in class technology sets us apart. There are multiple ways to transport material from source to job site. Utilizing Ozinga during the planning phase, the implementation of logistics management and flow of material all while capturing and providing the critical information from origin to point of consumption will increase efficiency and allow you to meet requirements. All this, coupled with both dispatch and a customer service team for added support will give you peace of mind and actualized time savings for any project you might tackle.
